

October 15, 2015

Dear Scott,

STEM education has become a major part of the YMCA of Central Florida Summer Zones, located at multiple middle school locations here in Orange County.

The DiSTI Duffer tournament has played a huge role in making sure that ALL students can get involved with STEM programming, no matter their financial situation. Over the past two years, the DiSTI Duffer has contributed \$5,900 towards the YMCA of Central Florida Summer Zone Scholarship Program! This equates to paying for more than 130 weeks of Summer Zone registrations!

This year's DiSTI Duffer did not disappoint. This corporation, along with the Central Florida STEM Education Council, convenes some of the biggest STEM advocates you can find throughout the area. Everyone had great questions about our YMCA programming and how they can help support our future engineers, scientists, and computer programmers. Not to mention, we had a blast on the course!

There's no doubt, that this year's contribution from the DiSTI Duffer will have a DIRECT impact on our Central Florida youth and our Y Family could not be more appreciative.

THANK YOU!

Cory Johns
